SOS

The public calamity situation presently lived worldwide, which forced many governments to declare a state of emergency in several countries, has imposed a series of extraordinary measures in order to provide a urgent response to the epidemic situation created by SARSCoV-2 coronavirus and by the COVID-19 disease.

In this challenging context, it was created the SOS Social Object Sanitary product line, to provide sanitary support in the containment and eradication of the COVID-19 outbreak. This product line originates from the partnership between PNH and the design studio ProvidênciaDesign.

TECHNOLOGY + DESIGN = SERVICE

PNH

Based in Portugal and operating for 45 years in the international market, PNH specialized in the manufacture of stainless steel equipment for the hospitality and health industries.

It's knowledge in metallurgy and metal mechanics, associated with the installation of 4000 m² of cutting-edge technology and with an extraordinary team of collaborators, has allowed PNH to sustain an international presence marked by a high response capacity.

The current pandemic circumstances and its consequences on our society, combined with the company's high social awareness, redirected a part of the company's manufacturing resources to the creation of sanitary and disinfection equipment, thus contributing to the efforts of COVID-19 eradication.

ProvidênciaDesign

This Portuguese design studio, founded almost 40 years ago, has distinguished himself throughout his history in Communication and Industrial Design, having received design awards, like the RedDot Award, for its work in industrial projects developed for interior, urban and museographic furniture.

At the same time, it has developed knowledge in device mediated culture.

ProvidênciaDesign was invited by PNH to share the challenge of creating a line of original and exclusive equipment, to respond to the immediate sanitary necessity, merging both function and aesthetics, fundamental to achieve excellency.

Wall mounted basic disinfection unit, for hand sanitizer.

120 x 575 x 120 mm

Technical Features

Dimension | 120x575x120mm
Power | DC6V/AA 4pcs
Warranty | 600 000 ciclos
Capacity | 800 ml
Autonomy | Fully autonomous

Characteristics

Touchless

Motion sensor included: just put the hand beneath the dispenser and it automatically provides a dose of sanitizer.

Fixed.

Customizable.

Metallic construction with the possibility of finishing in AISI 304 stainless steel or electrostatic white epoxy paint.

If requested, it can be produced in other colours or finishing.

Packed in corrugated cardboard with external dimensions being 160x610x160 mm.
